

Helping Hand # 20

To: All

From: National Supply Management Programs

Date: 23 October, 2009

Subject: New iPASS Security Badges

As part of the implementation of the Identification for Postal Access & Security Standardization (iPass) initiative, the Postal Inspection Service has procured a limited supply of non-technology based card stock.

[This card stock is only intended for use by the Districts when creating simple photo identification cards for employees or contractors in facilities where there are no physical access control systems \(PACS\).](#)

One side of the card has been pre-printed with advice on prohibition against misuse, emergency telephone numbers for the USPS and for facility closure information, and a return address of the local Area IT office where a lost card may be mailed. The employee information and photo can be printed on the clean side of the card using the iPass Card template made available to Information Systems managers and PACS administrators earlier this year. The card stock is available in quantities of 500. Please see the listing below to ensure your office orders the card with your Area's return address printed on the card.

PSIN	Description	NSN/PSN
O919CM	BADGE, USPS ID, PVC/PET, WITH CAP METRO AREA RETURN ADDRESS	8455-13-000-1001
