Date: September 29, 2010

Package #007

To Whom It May Concern:

Management has provided APWU with the following documentation:

- 1. A copy of the Southwest FSO FSSP Problem Work Sheet
- 2. Employee on the Clock report.
- 3. Cost Comparison Estimate.

Call #91467 #1 Central VMF.

I received a copy of the Invoice from Gulf South Fence Access and the copy of the Verification of Work Completed.

Although this information was provided, it was not the information I requested. This is to notify the Step 2 Designee that all documentation requested were not provided.

Thank You,

Koren White

Karen White APWU, Union Steward

POSTAL SERVICE.

Article 32 Due Consideration Worksheet

Facility ID: 484146-G25

Facility: HOUSTON CENTRAL VMF 2801 WASHINGTON AVE HOUSTON, TX 77007-6025

Problem Description:

Vela Entrance gate could fall, top roller is very loose and could come off and it does the gate will fall.

USPS Area: Southwest

USPS District: Houston

Date Problem Reported: 06/01/2010 Call Number: G91487 Problem ID: 1

Date Problem Forward to Maintenance: 06/01/2010

Office Forwarding Problem to Maintenance: Southwest Facilities Service Office

Date Problem Declined by Maintenance: 09/11/2010

Article 32 Due Considerations Prepared By: RUBEN CRUZ

ARTICLE 32 DECLINE RATIONALE

Cost Criteria: This program does not fall into the category of routine preventive, predictive, or corrective maintenance activities. All available maintenance craft employees are already scheduled with 40 or more hours of work maintaining existing systems and equipment. Using these employees would require the expenditure of considerable work hours at the overtime rate making it not cost effective as compared to contract costs.

Efficiency Criteria: Forwarding Central VMF gate to facilities provides facilities the ability to have a contractor possessing the necessary engineering level skills in the area of construction and design layout to ensure contract compliance. The contractor provides a level of expertise in the field of repair and alterations developed from formal training and multiple years of hands-on experience in performing the same or similar site preparation for other businesses. Postal maintenance employees are hired and assigned to plants to conduct routine preventive, predictive, or corrective maintenance on the existing installed equipment and systems. The work being considered in this proposed contract is not routine to the in-house workforce, which considerably influences efficiency

Equipment Criteria: Hand and power tools are available in each maintenance capable site

Personnel Criteria: Existing Hand and power tools are available in each maintenance capable site in-house bargaining unit maintenance generally possess good basic skills in the construction trades, however, since this is not work performed on a regular routine basis the skill levels are considerably less than that of a licensed contractor. AMT's Bitner is at Pearland & Friendswood, Clack is at River Oaks, Hasan is Doing EWP, Loving is at Pasadena, Martinez is at Cleveland & Shepherd, Roberts is at Crosby, Sims is at Richmond and Smith is Pasadena.

Public Interest Criteria: In order to minimize the negative impacts on public interest such as unavailability of postal products and unacceptable additional costs, subcontracting ensures expeditious completion of the project. The customers of maintenance are the stations and branches as well as the outlying facilities that depend on maintenance employees for the emergency services it performs. Long-term involvement in contractor style work could deprive these customers of the vital work that they require
