

“Presumptive” Disability Benefits for Certain Groups of Veterans

What is “Presumptive” Service Connection?

VA *presumes* that specific disabilities diagnosed in certain veterans were caused by their military service. VA does this because of the unique circumstances of their military service. If one of these conditions is diagnosed in a veteran in one of these groups, VA presumes that the circumstances of his/her service caused the condition, and disability compensation can be awarded.

What Conditions are “Presumed” to be Caused by Military Service?

Veterans in the groups identified below: Entitlement to disability compensation may be presumed under the circumstances described and for the conditions listed.

Veterans within one year of release from active duty: Individuals diagnosed with chronic diseases (such as arthritis, diabetes, or hypertension) are encouraged to apply for disability compensation.

Veterans deployed to the Southwest Asia Theater of Operations from August 2, 1990, to July 31, 1991: Individuals diagnosed with amyotrophic lateral sclerosis (ALS)/Lou Gehrig’s disease are encouraged to apply for disability compensation.
